**Strategic Healthcare Programs, LLC Announces
Availability of a Data Interface for Users of RiverSoft's SAM™ Software**

April 10, 2007 - Strategic Healthcare Programs (SHP), provider of outcomes, benchmarking and OASIS data services to the home care market is pleased to announce the release of a data interface between the two companies' systems. This interface facilitates *automatic*, electronic exchange of data, including locked and unlocked OASIS data and other key information, from SAM™ to SHP for Agencies™.

According to Barbara Rosenblum, Chief Executive Officer of SHP, "Our common customers will benefit significantly from the interface through instant and simple access to information like OASIS audits with alerts, real-time clinical and financial benchmarks, and data drill-down reports. With this interface, data is automatically uploaded to SHP reducing the tasks an agency has to manage. SHP enhances the quality assurance workflow within SAM whereby customers can use the SHP reports and alerts to improve accuracy to impact clinical outcomes and revenue. SAM users can now, more easily than ever, participate in the leading and most comprehensive data program on the market."

Strategic Healthcare Programs, LLC, is based in Santa Barbara, California. SHP offers award-winning performance data services, industry benchmarks, and patient satisfaction programs to over 1500 customers. SHP sweeps data from software applications and automatically returns real-time, actionable information. Online analytic tools and drill downs make ad hoc reporting available to the entire home health organization. To learn more about SHP for Agencies™ or other programs for the sub-acute market, visit www.SHPdata.com

RiverSoft, Inc. is based in Melbourne, Florida. RiverSoft, Inc. is a home care automation entity that serves home care providers in 29 states. The company specializes in software products and services to streamline the home health operation. Service Agency Manager (SAM) is a powerful, inexpensive and easy-to-use software system to manage your day to day tasks involved in providing home health care. Mobile Assessment Tool (MAT) is RiverSoft's new "Point-of-Care" system that works in conjunction with SAM enabling field access to schedules, electronic charting, plan of care, visit notes and more.
