Strategic Healthcare Programs, LLC and Delta Health Technologies, LLC Announce Automated Interface between Healthcare Software Programs

(Santa Barbara, CA and Altoona, PA) - August 20, 2007 - Strategic Healthcare Programs (SHP) and Delta Health Technologies have jointly developed an electronic, automated data exchange program for homecare agencies, leveraging the strengths of Delta and SHP applications. The integration enables the expanded use of SHP for Agencies™ including real-time OASIS audits with alerts, current clinical and financial benchmarks, data drill-down reports, clinician level reporting and PPS analyses.

OASIS, claims, and other mission-critical data residing in the Delta's Encore solution will upload automatically and seamlessly to SHP, which saves their mutual customers significant time. This also enables enhanced functionality for outcomes and benchmarking, including access to key PPS and predictive modeling reports. Delta customers can receive information that helps them to respond to issues that matter most at any given moment, including clinical, operational and financial intelligence.

Barbara Rosenblum, CEO of SHP, states, "SHP is extremely pleased to bring our functionality to Delta and its client base, just in time to offer additional assistance to agencies preparing for the changes from PPS 2008."

"The best way for us to continue providing outstanding service to our customers is to be responsive to their needs," said Keith Crownover, president and CEO of Delta Health Technologies. "Many of our customers use SHP for their data analysis and we are pleased to eliminate the technology challenges so that our customers can continue to focus on providing excellent patient care."

About SHP

Strategic Healthcare Programs, LLC, is based in Santa Barbara, California. SHP offers award-winning performance data services, industry benchmarks, and patient satisfaction programs to over 1500 customers. SHP sweeps data from software applications and automatically returns real-time, actionable information. Web-based analytic tools and drill downs make ad hoc reporting available to the entire home health organization. To learn more about SHP for Agencies™ or other programs for the sub-acute market, visit www.SHPdata.com.
