

A COMPREHENSIVE PERFORMANCE IMPROVEMENT SOLUTION

SHP for Long-Term Post Acute Care

A better way to manage your performance

IntelliLogix™ is a web-based MDS scrubbing and data analytics solution that gives your skilled nursing organizations powerful tools to improve your **clinical, financial** and **operational performance**.

We quickly reveal trouble spots and help you improve revenue, five star ratings, PDPM performance and survey readiness.

Accelerate Your Facility's Performance Improvement

The increased focus on quality, value-based purchasing and shrinking reimbursements affect all providers today. In today's environment SNFs need more actionable data to drive daily decisions. Our real-time reports help you:

- Optimize reimbursement, catch MDS inconsistencies and errors prior to submission
- Improve readmissions, quality of care and outcomes
- Successfully navigate PDPM and COVID-19
- Become fully prepared for survey

Optimize Your Reimbursement Catch Errors Before Submission

We've created secure interfaces with all EHR vendors to extract your MDS data automatically. Our MDS Scrubber then identifies inconsistencies and fatal errors that impact reimbursement and your quality scores, so you can fix the issues before submitting to CMS.

Beyond just fixing errors, IntelliLogix™ provides alerts for all affected areas, shows you relevant PDPM alerts for PDPM optimization and helps you with finding the appropriate billable ICD-10 codes.

PDPM—It's a good time to have SHP.

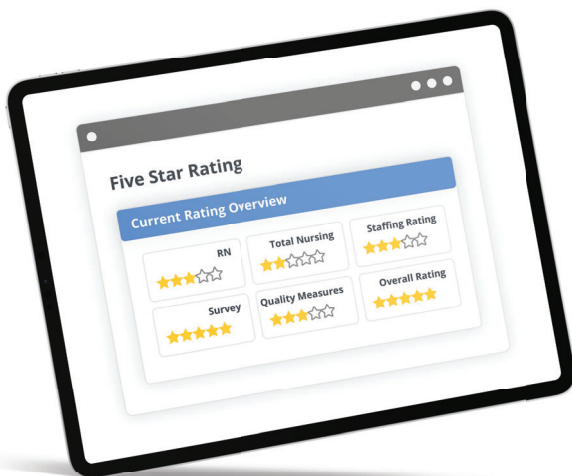

SHP has been working hard to provide the right tools that will help providers thrive under the new payment model. We were the first software vendor to incorporate PDPM into our solution to help you optimize your performance.

The reporting tools are second to none and assist us with focusing our time and resources on specific issues identified as risks.

Improve Quality and Five Star Ratings

With IntelliLogix™ Five Star Rating solutions, you will have the insight you need to target problem areas and stay ahead of the ratings with forward-looking 'what-if' tools.

- Know exactly where you've been, how your score was calculated and where it came from.
- Determine where you're headed plus quickly identify what you can do today to drive your ratings of tomorrow.
- Model how staffing, quality measures and survey improvements would impact your scores with our Five Star Prospective Tool.

Resident Risk Analysis

Using both CMS scoring criteria and SHP proprietary thresholds, our MDS scrubber will trigger alerts on high-risk residents covering ten distinct risk categories. The Resident Risk Report provides an in-depth analysis of risk factors that may be affecting an organization’s residents to help you monitor individual patient trends and ensure the care plan is appropriate.

Manage Rehospitalizations

Given its effect on the continuity of care and reimbursement, it is vital to determine your rehospitalization rate, identify residents at risk for rehospitalization and determine the impact on your organization’s financial performance.

IntelliLogix™ monitors your rates of rehospitalization and helps you investigate the reasons and identify trends and patterns.

Improve Survey Readiness

Be proactive in preparing for survey with our set of reports and Survey Outcome tools. We help you review at-risk residents, segment facilities based on risk for increased scrutiny and areas for improvement so you can prioritize your efforts to reduce citations.

Using the IntelliLogix™ PDPM tools, with MDS Scrubber integration, diagnosis code correlation and crosswalks has helped us streamline our processes and monitor measurable performance benchmarks.

About SHP

Strategic Healthcare Programs (SHP) is a leader in data analytics and benchmarking that drive daily clinical and operational decisions. Our solutions bring real-time data to post-acute providers, hospitals and ACOs to better coordinate quality care and improve patient outcomes.

SHP acquired Team TSI in 2020 and expanded its analytics offering to the skilled nursing market with IntelliLogix™. Team TSI, launched in 1991, is a leader in data analytics to the long-term post acute care industry.

Our Support Team is Legendary in the Industry

Your dedicated SHP Customer Manager provides one-on-one support to help you maximize your use of the SHP program. As your main contact, they not only solve your issues in a timely and friendly manner, but they also help you succeed.
