STRATEGIC HEALTHCARE PROGRAMS

Preparing for the HHVBP National Expansion

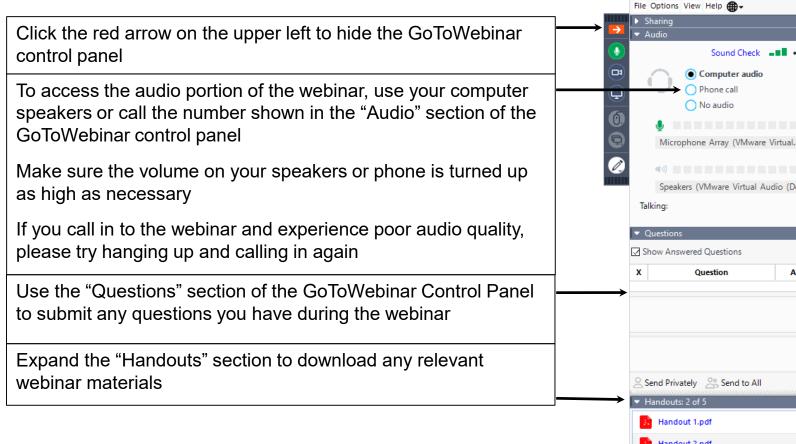

Zeb Clayton VP of Client Services

Chris Attaya VP of Product Strategy

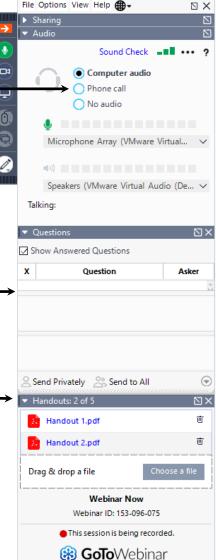

Winning Wednesday Webinar Series

Enhancing Your Webinar Experience

All presentations are recorded, so if you have technical problems, all is not lost!

Objectives

- Review the five-year VBP model structure and significant changes
- Review Proposed Rule (CY 22) HHVBP national expansion
- Review statistics surrounding outcomes and reimbursement impact from the model
- How SHP is helping you prepare for the National Expansion
- Question & Answers

Review the five-year VBP model structure and significant changes

CMMI 10 years later

- Launched 54 models to address critical areas of health care and to test innovative payment and service models
- Most have not saved money but cost money
- HHVBP results show a 4.6% improvement in quality scores for HH (it is one of only 5 programs of the 54 which shows savings!)

Source: CMS Innovation Center at 10 Years-Progress and Lessons Learned, Brad Smith, NEJM January 2021

HHVBP CMMI Demonstration

- 5 year pilot starting with Performance Year 2016
- Bonus or Penalty up to 3% first year then 5%, 6%, 7%, 8%
- Baseline year 2015 used for calculating the median (achievement threshold) and mean of top decile (benchmark)
- 17 OASIS/Claims/HHCAHPS measures (90% of the score) along with 3 "New Measures" New Measures scored based on self reporting data only (10% of the score)
- Up to 10 Points for Achievement and Improvement for each measure get the higher of the two
- Total Performance Score (TPS) for each CCN is used to calculate the Linear Exchange Function (LEF) to determine the adjustments for the "payment" years

Original Measures by NQF Domain

Domain	Measure	Measure Type	Source
1	Communications between Providers and Patients	Outcome	CAHPS
1	Specific Care Issues	Outcome	CAHPS
1	Overall rating of home health care	Outcome	CAHPS
1	Willingness to recommend the agency	Outcome	CAHPS
2	Improvement in Ambulation-Locomotion	Outcome	OASIS (M1860)
2	Improvement in Bed Transferring	Outcome	OASIS (M1850)
2	Improvement in Bathing	Outcome	OASIS (M1830)
2	Improvement in Dyspnea	Outcome	OASIS (M1400)
2	Drug Education on All Medications Provided to Patient/Caregiver	Process	OASIS (M2015)
3	Discharged to Community	Outcome	OASIS (M2420)
4	Influenza Immunization Received for Current Flu Season	Process	OASIS (M1046)
4	Pneumococcal Polysaccharide Vaccine Ever Received	Process	OASIS (M1051)
5	Acute Care Hospitalization:	Outcome	CCW (Claims)
5	Emergency Department Use without Hospitalization	Outcome	CCW (Claims)
6	Improvement in Pain Interfering with Activity	Outcome	OASIS (M1242)
6	Improvement in Management of Oral Medications	Outcome	OASIS (M2020)
6	Care of Patients	Outcome	CAHPS
			Total

DOMAINS

1) Patient and Caregiver centered experience

2) Clinical Quality of Care
 4) Population Health

3) Communication & Care Coordination

5) Efficiency and cost reduction

6) Safety

Changes in HHVBP across five years

• CY 2018 Final Rule

- Changed HHCAHPS to 40 completed surveys versus 20 (back to HHVBP start)
- Removed Drug Education from measure list starting in PY 3 (CY 2018)
- Performance Year 4 (CY 2019)
 - Removed 5 OASIS measures from the applicable measures
 - Added two new "Composite" measures Total Normalized Composite for Mobility and for Self Care
 - New Weighting for the measure scores for 90% of the TPS (10% for new measures)
 - 35% for the OASIS-based measures (6 outcomes); 35% for the Claims-based measures (2 outcomes); 30% for the HHCAHPS measures (5 outcomes)
 - Reducing the maximum points for Improvement from 10 points to 9 points
- Performance Year 5 (CY 2020)
 - CMS proposes to end the program early and not apply any adjustments from the PY 5 due to uncertainties from the pandemic and the exempted quarters

TNC Measure Calculation

• The magnitude of possible change depends on the response score of the OASIS Items

	rent Ability to Dress Lower Body safely (with or without dressing aids) including dergarments, slacks, socks or nylons, shoes:
Enter Code	0 Able to obtain, put on, and remove clothing and shoes without assistance.
	1 Able to dress lower body without assistance if clothing and shoes are laid out or handed to the patient.
	2 Someone must help the patient put on undergarments, slacks, socks or nylons, and shoes.
	3 Patient depends entirely upon another person to dress lower body.
	hing: Current ability to wash entire body safely. <u>Excludes</u> grooming (washing face, washing hands, and ampooing hair).
Enter Code	0 Able to bathe self in shower or tub independently, including getting in and out of tub/shower.
	1 With the use of devices, is able to bathe self in shower or tub independently, including getting in and out of the tub/shower.
	2 Able to bathe in shower or tubwith the intermittent assistance of another person:
	(a) for intermittent supervision or encouragement or reminders, OR
	(b) to get in and out of the shower or tub, <u>OR</u>
	(c) for washing difficult to reach areas.
	3 Able to participate in bathing self in shower or tub, <u>but requires presence of another person throughout the bath for assistance or supervision.</u>
	4 Unable to use the shower or tub, but able to bathe self independently with or without the use of devices at the sink, in chair, or on commode.
	5 Unable to use the shower or tub, but able to participate in bathing self in bed, at the sink, in bedside chair, or on commode, with the assistance or supervision of another person.
	6 Unable to participate effectively in bathing and is bathed totally by another person.

Response Options: 4 Max (+) Change: +3 Max (-) Change: -3

Response Options: 7 Max (+) Change: +6 Max (-) Change: -6

TNC Measure Calculation Steps

Computed and normalized at the episode level, then aggregated to the HHA level using the following steps:

- Step 1: Compute Absolute Change for each OASIS item by Episode
 - Subtract discharge response value from SOC/ROC response value for each OASIS item
- Step 2: Compute Normalized Change for each OASIS item by Episode
 - Divide the absolute change by the maximum positive change possible for each OASIS item
 - Normalized change ranges from -1 to +1 by OASIS Item
- Step 3: Sum the Normalized Changes across All OASIS items by Episode
 - Sum the normalized scores for each OASIS item in each composite measure (TNC in Self-Care ranges from -6 to +6; TNC in Mobility -3 to +3)

TNC Measure Calculation Steps

- Step 4: Average the HHA's Episode-level TNC Values
 - HHA's averages range from -6 to +6 for TNC in Self-Care and from -3 to +3 for TNC in Mobility
- Step 5: Compute the HHA's risk-adjusted TNC Measure
 - Formula: HHARisk Adjusted = HHAObserved + (NationalPredicted – HHAPredicted)

TNC Measure Calculations

Composite Measure	Activity (OASIS Item)	Status at SOC*	Status at DC*	Possible	Step 1 Raw Change	Step 2 Normalized Change	Normalized	
				Change			Change	
TNC	Toilet Transferring (M1840)	4	3	4	1	0.250		
Change in	Bed Transferring (M1850)	5	2	5	3	0.600	1.350	
Mobility	Ambulation (M1860)	4	1	6	3	0.500		
	Grooming (M1800)	1	2	3	-1	-0.333		
THE	Upper Body Dressign (M1810)	3	1	3	2	0.667		
TNC Changes in	Lower Body Dressing (M1820)	2	1	3	1	0.333	1 000	
Change in Self-Care	Bathing (M1830)	3	1	6	2	0.333	1.800	
Self-Care	Toilet Hygience (M1845)	3	0	3	3	1.000		
	Eating (M1870)	0	1	5	-1	-0.200		

* A value of "0" indicates a status of most independent for each OASIS item. The value for most

dependent status varies by OASIS item and is equal to the item's "Maximum Possible Change"

TNC Measure Calculations

• Step 4:

Average the HHA's Episode-level TNC Values

• Step 5:

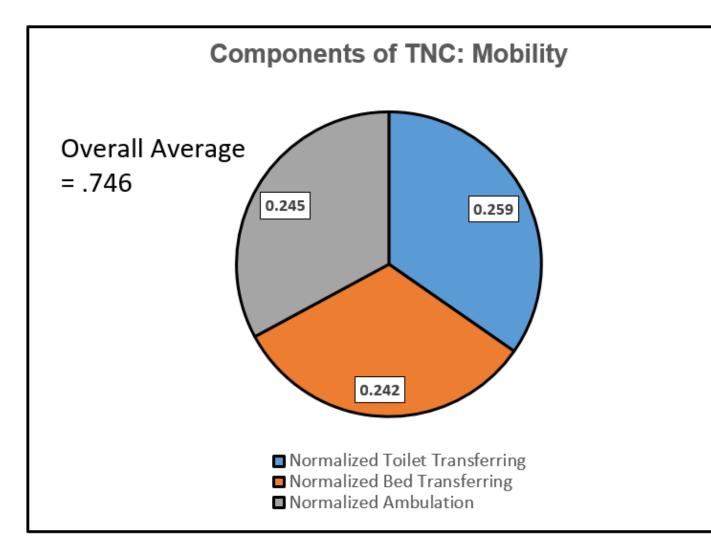

Formula: HHARisk Adjusted = HHAObserved + (NationalPredicted – HHAPredicted)

0.63 + 1.00 - 0.73 = 0.90

	Mobility							
Episode	Step 3	Step 4	Episode- Level Predicted	HHA-Level Predicted	National Predicted	Step 5		
1	1.4		1.54					
2	1.4]	1.26					
3	1.4]	1.54					
4	1.4]	1.68]				
5	1.4	1	1.54	1				
6	1.4	1	1.26	1				
7	1.4	1	1.54	1				
8	1.4	1	1.68					
9	1.4	1	1.54					
10	0	0.63	0.15	0.72	1.00	0.90		
11	0	0.03	0.20	0.73	1.00	0.90		
12	0	1	-0.15	1				
13	0	1	0.20	1				
14	0	1	0.15					
15	0	1	0.20	1				
16	0	1	-0.15	1				
17	0	1	0.20					
18	0	1	0.20	1				
19	0	1	0.20	1				
20	0	1	-0.15	1				

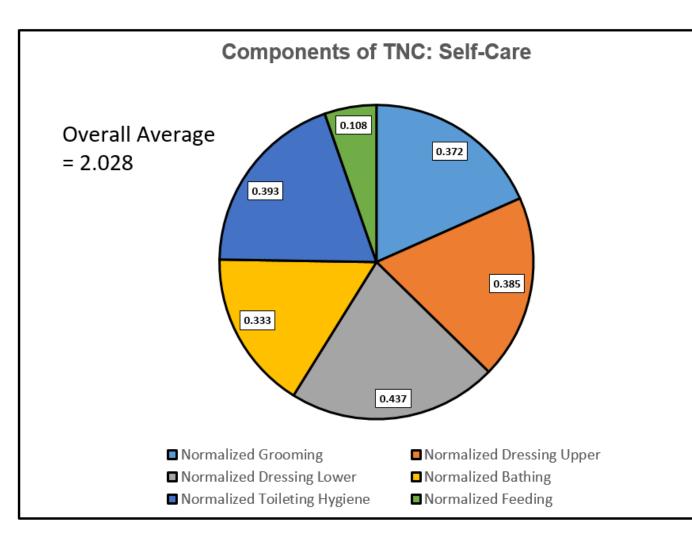

TNC: Mobility by Measure (Observed)

TNC: Self Care by Measure (Observed)

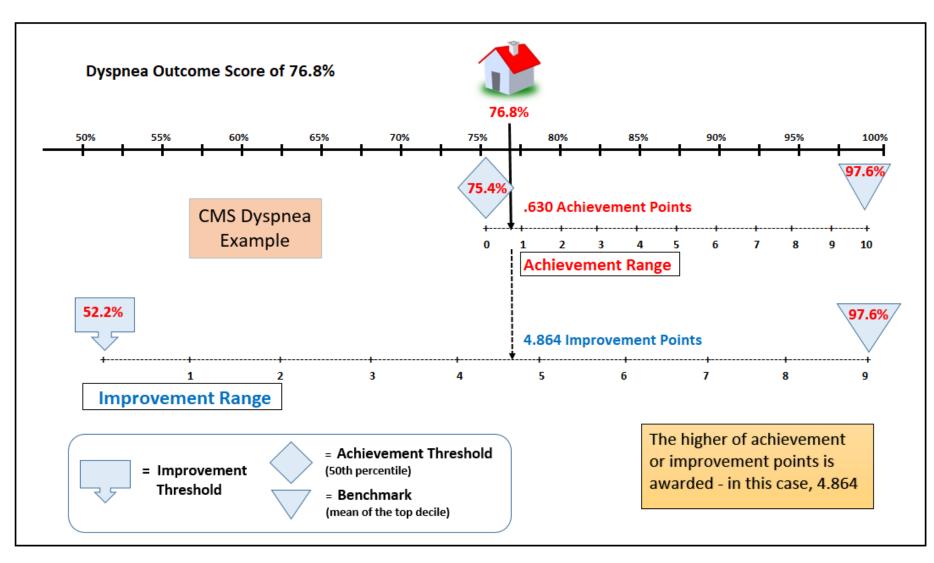

Review Proposed Rule (CY 22) HHVBP national expansion

CMS Proposed Rule - June 28, 2021

- Proposal to expand HHVBP demonstration nationally effective January 1st, 2022
- All HHAs certified to participate in Medicare program prior to 1/1/21 required to participate
- Payment range of increase or decrease of up to 5% of Medicare revenues
- Improvement in Pain measure will be removed; No longer need to report "New Measures" (self reported)
- Points scoring similar to the approach used in CMMI PY 4 demonstration
 - 10 points for Achievement; 9 points for Improvement

HHVBP Measure Points Scoring

- HHVBP dates
 - CY 2019 Baseline year
 - CY 2022 1st Performance Year
 - CY 2024 1st Payment Adjustment Year
- Newly certified HHA schedule

Medicare-certification Date	Baseline Year	Performance Year	Payment Year
Prior to January 1, 2019	2019	2022	2024
On January 1, 2019 - December 31, 2019	2021	2022	2024
On January 1, 2020 – December 31, 2020	2021	2022	2024
On January 1, 2021 – December 31, 2021	2022	2023	2025

HHVBP Cohorts and Weighting

- Creating Smaller- and Larger Volume HHA Cohorts for setting benchmarks, achievement thresholds and competing for payments
- Smaller-volume HHA cohort are exempt from submitting the HHCAHPS survey under HH QRP (fewer than 60 eligible patients)
- Cohorts would be compared nationwide vs by state
- TPS Weighting
 - OASIS Items 35% (5 measures)
 - Claims Data 35% (2 measures)
 - 75% 60-Day Hospitalization
 - 25% ED use without Hospitalization
 - HHCAHPS 30% (5 measures)

Proposed Weighting Schedule

	Measure Reporting Scenarios						
Measure	All Measures	No HHCAHPS	No Claims	No Claims or HHCAHPS			
OASIS							
TNC Self-Care	8.75%	12.50%	13.46%	25.00%			
TNC Mobility	8.75%	12.50%	13.46%	25.00%			
Oral Medications	5.83%	8.33%	8.98%	16.67%			
Dyspnea	5.83%	8.33%	8.98%	16.67%			
Discharged to Community	5.83%	8.33%	8.98%	16.67%			
Total for OASIS-based measures	35.00%	50.00%	53.85%	100.00%			
Claims							
ACH	26.25%	37.50%	0.00%	0.00%			
ED Use	8.75%	12.50%	0.00%	0.00%			
Total for claims-based measures	35.00%	50.00%	0.00%	0.00%			
HHCAHPS Survey Measure Components							
HHCAHPS Professional Care	6.00%	0.00%	9.23%	0.00%			
HHCAHPS Communication	6.00%	0.00%	9.23%	0.00%			
HHCAHPS Team Discussion	6.00%	0.00%	9.23%	0.00%			
HHCAHPS Overall Rating	6.00%	0.00%	9.23%	0.00%			
HHCAHPS Willingness to Recommend	6.00%	0.00%	9.23%	0.00%			
Total for the HHCAHPS Survey-based measure	30.00%	0.00%	46.15%	0.00%			

Total Performance Score (TPS)

- A numeric score, ranging from 0 to 100, awarded to each qualifying HHA based on the weighted sum of the performance scores for each applicable quality measure
- The HHA's TPS would reflect all of the claims- and OASIS-based measures for which the HHA meets the minimum of 20 home health episodes of care per year
- The individual components that compose an HHCAHPS survey measure for which the HHA meets the minimum of 40 HHCAHPS surveys received in the performance year
- HHA needs at least 5 Quality Measure scores to have a TPS score

TPS Example

1 Quality Measure	2 Points for Applicable Measures	③ Proposed Weight (percentage)	(4) Weighted Points
OASIS			
TNC Self-care	7.661	8.75	6.703
TNC Mobility	5.299	8.75	4.637
Oral Medications	3.302	5.83	1.925
Dyspnea	4.633	5.83	2.701
Discharged to Community	0.618	5.83	0.360
Claims			
ACH	1.180	26.25	3.098
ED Use	0.000	8.75	0.000
HHCAHPS Survey Components			
HHCAHPS Professional Care	10.000	6.00	6.000
HHCAHPS Communication	10.000	6.00	6.000
HHCAHPS Team Discussion	10.000	6.00	6.000
HHCAHPS Overall Rating	5.921	6.00	3.553
HHCAHPS Willingness to Recommend	8.406	6.00	5.044
Total Performance Score		100.00	46.021

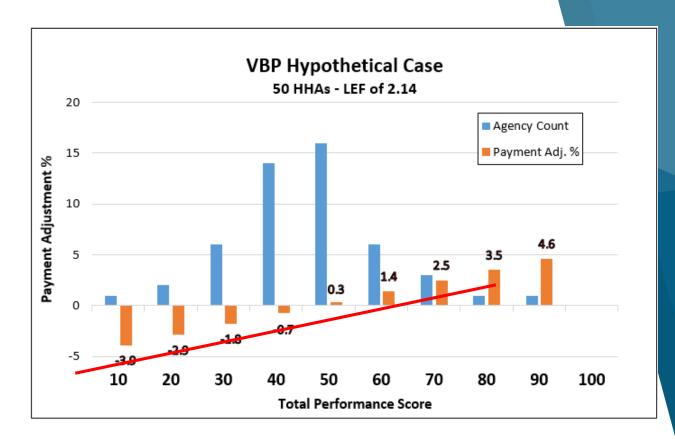

Linear Exchange Function (LEF)

- Each agency's value-based incentive payment amount for a fiscal year will depend on:
 - Range and distribution of agency total performance scores
 - Amount of agency's base operating HHRG payment amount
- The value-based incentive payment amount for each agency will be applied as an adjustment to the base operating HHRG payment amount for each episode

 One agency is 10 times the size of the others with TPS scores of 20 vs 50 vs 80

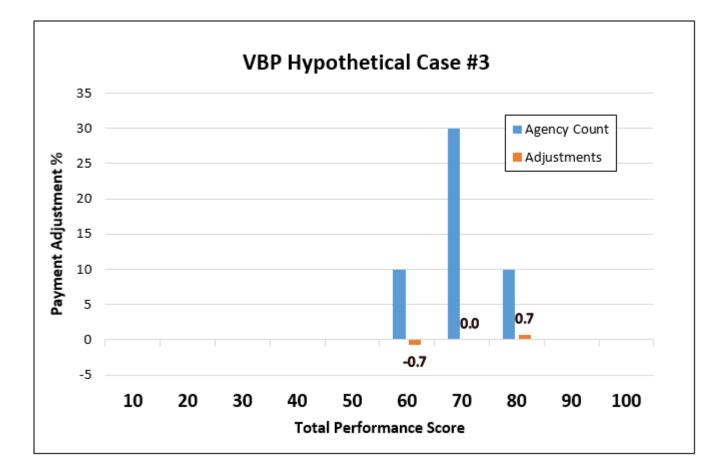

• Same 50 Agencies but with TPS scores closer together...

• And then they all increase their TPS scores by 20 Points...

• Shared in the Proposed Rule – Large volume cohort

State	# of	Average Payment	Payment Adjus	tment Percentile [Distribution (%)
State	HHAs	Adjustment %	20%	50%	80%

Performance Feedback Reports

- Interim Performance Report (IPR)
 - Distributed Quarterly (first one in July 2022)
 - Includes 12 most recent months of data
 - Provides feedback to HHAs regarding performance both achievement and improvement within their applicable nationwide cohort
 - Both Preliminary and Final IPRs (after any appeals) will be issued
- Annual TPS and Payment Adjustment Report (3)
 - Preview Annual Report confidential review of scores and adjustments
 - Preliminary Annual Report (if applicable) if agencies appeal their data
 - Final Annual Report issued before the start of the payment adjustment year

SHP National TPS Scores

- Although PY 5 (CY 2020) will not be used – agencies on average continue to improve their TPS scores
- Note the bell curve shifting to the right comparing the blue to the orange bars

How SHP is helping you prepare for the National Expansion

"The Star Ratings, TPE, HHVBP all happened at same time. Sometimes, in the beginning, it was a little like a tug-of-war. Until we figured out that there was much overlap."

Source: 4th Annual Report of Evaluation of HHVBP Model Report

BSHP

Using the SHP VBP National Preview Report

- Start with Parameter Page to select the reporting period end dates
- For larger enterprises quickly identify the poorer performing CCN's by comparing their TPS scores and national SHP percentile ranks
- Hover your mouse over the rank to see the specific SHP rank
- New Datasheet provides measure details for further analysis

Preparing for the National Rollout

- Use our report to help identify opportunities to improve your TPS scores
 - Compare your CY 21 measure scores to the Baseline Year
 - Verify if agency scores are over the achievement threshold or have improved since the baseline year
 - Review the thumbnail graph to see how these scores are trending
 - Drill down from your current scores to the outcome patient detail reports for further analysis
 - Identify the agency's national rank and consider setting goals based on percentile rank

Note: Your percentile rank from the previous state-based cohorts may be very different when compared to the national cohorts

Upcoming Enhancements in CY 2022

- Risk-Adjusted TNC Measures
- Update Thresholds, Benchmarks, and Baselines to 2019 using CMS finalized HHVBP data
- Evaluate Small vs Large Cohort reporting
- Evaluate handing of new agencies and changes to baseline data
- Add TNC measures to the clinical reporting suite
